

CARTON FUN FACTS

Did you know?

Empty, Wash, Squash and Recycle

- ▶ The best way to recycle your cartons is to **empty, wash and squash them first**. This keeps your bin clean, saves space in your bin, and **saves trucks on the road**.
- ▶ You can fit **3 times** as many cartons in your recycling bin if you **squash them** first.
- ▶ Just 1 teaspoon of liquid left in your carton is the same weight as the entire carton you drink your school milk from, so don't forget to **drink up!**
